Simple, Sturdy & Reliable

Strangko's Handy Wash is a new generation of washing unit with PLC control and screen info. It can be installed together with any new or existing parlour and has up to 5 program steps that can be freely combined in one wash cycle.

As a standard, Handy Wash is delivered with 2 detergent pumps but there is the possibility for a third pump. Pump 3 is intended for sanitizing and also for alternate wash.

The water and electrical sections are separated.

The Handy Wash is available in various languages (DK, EN, GER, FR, NL, ESP).

Important Features:

- * Automatic start of sanitizing before milking
- * Optional/free choice of program step
- * Choice of warm/cold water
- * Temperature controlled water inlet
- * Time controlled water inlet alarm
- * Controls diverter, separator, and drain valves
- * Separation of water for cleaning purpose
- * Tank and wash alarm
- * Inverting of drain valves output NO/NC
- * Controls up to three detergent pumps
- * Possibility for diverting first pump in selected cycles
- * Possibility of adding extra water

- * Detergent mixing in the wash alkaline
- * Automatic chemical alternate
- * Dosage in detergent container possible for manual dosage
- * Signal for:
 - high vacuum
 - control of external air injector
 - control of plate cooler
- * Time setting:
 - of each program with circulation
 - of each program with drain open
 - pause between rinse 1 and wash program
 - of milk pump, pumping remaining water
- * Slug wash control of air and water injections and wash valve control
- * Monitoring and alarm if temperature gets below a set temperature during wash process
- * Monitoring of detergent in wash water
- * Alarm if no chemicals
- * Control with 4-line LCD display for man-to-machine communication (shows time and every function)
